View in Chrome Web Store

Open

Open a Local Project

Navigate and open an existing project

Clone or Check Out

Open from source control repositories like GIT, TFS or SVN

New Project

Process

Start with a blank project to design a new automation process.

Library

Create reusable components and publish them together as a library. Libraries can be added as dependencies to automation processes.

Test Automation

Start with a blank project to create a new test project

Template

Create a template that you can use to build automations that have a set of predefined common characteristics.

New from Template

Background Process

Create a process that starts in the Background and can run concurrently with other processes for as long as it doesn't use UI interaction.

Mobile Testing Project

Create a project for your mobile app automated test cases

Orchestration Process

Implement a process through service orchestration and human intervention as well as through long-running transactions
